A software development engineer with a computer-science degree and many years of hands-on experience in different areas of IT industry. I worked with a variety of technologies and programming languages (see below). I am passionate in professional improvement and currently my goal is becoming a functional developer with extensive experience in a range of complex areas.

SKILLS

Key Strengths

- Over 10 years of full-time and full-stack software development experience
- Wide experience in development desktop and web-based applications
- Strong knowledge of OOP principles
- Enthusiasm for learning new technologies and effectively using them

Engineering

- **Enterprise Web Application Development** - .Net, C++, C#, Java, Scala
- **Data Engineering** - SQL, MSSQL, MySQL, Cosmos DB
- **Windows desktop Development** - ATL, MFC, WinForms, WPF
- **Web Client Development** - Typescript, react, redux, mobx, material design
- **Infrastructure** - Cloud service providers including Azure and AEM
- **OS** - Windows, Linux, MacOS
- **Tools** - VS Code, IntelliJ Idea, Eclipse, Metals, Git

General

- **Language Skills** - Russian as mother tongue, English(Upper-Intermediate, B2)

EXPERIENCE

Across Systems GmbH

Karlsruhe, Germany

Software developer

2019.01-...

Design, development and support of Elanion(<https://www.across.net/en/products/elanion>) a cloud middleware, integrating different content systems into translation management. The project has a microservices architecture(event driven) based on Azure Cloud.

Responsibility :

- designed, developed and supported the core part of microservices and SPA web application,
- designed and developed Java plugin for Adobe Experience Manager(CMS)
- unit and functional testing,
- Azure DevOps development.

Technologies : SaaS, Azure(EventGrid, Cosmos DB), OOP, .Net Core, Java, SQL, REST API, React, MobX, Material Design, Docker, Scrum

Eldis soft

Novosibirsk, Russia

Frontend developer

2017.10-2018.05

The project is document management system for any securities issuers serviced through the system, based on mutual transfer-agent services provided to each other by registrars participating in the system. The development based on functional stack where I started as frontend developer.

Responsibility :

- implemented new features and improved the existed solution,
- performance optimization. The most problem was connected to the project structure, so a lot of work was done to reduce the latency from 2 sec to 50 ms,
- improved UI testing by migration from mocha test framework to Jest (it reduced tests execution time from 1.5 min to 6 sec).

Technologies : Scala, Functional Programming, SBT, Cats, http4s, Dobbie, Circe, Shapeless, Typescript(fp-ts, io-ts, monocle-ts), React, Redux, Jest, WebPack, REST API, git

Xored Software Inc

Software engineer

Novosibirsk, Russia

2016.01-2017.09

Work with Cisco on Enterprise Network Management system. Cisco Prime™ Infrastructure provides a single integrated solution for the complete lifecycle management of Cisco routers, switches, and wireless devices along with deep visibility into the end-user connectivity and application performance. I have participated in two projects as a full-stack developer related to data-aggregation software based on an application with a huge legacy code and Cisco software update framework.

Responsibility :

- implemented new features on client and server sides,
- bug fixing,
- supported for problems related to updating software modules,
- participated in multiple customer troubleshooting sessions, fixed issues on customer's setups.

Technologies : Java EE, Spring, Hibernate, JavaScript, JUnit, Mockito, Maven, git

Across Systems.ru

Software developer

Novosibirsk, Russia

2008.07-2015.12

Design, development and support of a boxed software product for managing the translation process and organizing the translator's workplace (distributed multi-level system). I have been involved in many parts of the system, mainly as a c++ / c# developer.

Responsibility :

- developed windows desktop client (MFC, WinForms, WPF),
- implemented plugins for MS Office, Adobe InDesign, FrameMaker,
- implemented COM library components
- implemented tests with interaction between Native and Managed code

Technologies : C++ (C++03/C++11), STL, boost, WTL/ATL, COM, C#, .Net, WinForms, WF, WPF, ASP.NET MVC, MS SQL, Entity Framework, MS Test, cppunit, XML/XSLT, IoC(AutoFac, MEF), Scrum

EDUCATION

Novosibirsk State Technical University

Master's degree of information and computer science

2003-2006

- Design and analysis of hybrid systems by Petri net

Novosibirsk State Technical University

Bachelor of information and computer science

1999-2003

CERTIFICATES

- Introduction to Scala <https://stepik.org/cert/863833>
- Functional Program Design in Scala
<https://www.coursera.org/account/accomplishments/verify/6VR2P8ACCDTD>
- Functional Programming Principles in Scala
<https://www.coursera.org/account/accomplishments/verify/DKWXKRNZ7QPH>
- Lightbend Scala Language - Professional <https://academy.lightbend.com/certificates/941cc16885164aa681fb9b4f098e31e2>
- Functional programming in Haskell
<https://stepik.org/cert/907732>
- Microsoft Certified: Azure Developer Associate
<https://www.credly.com/badges/7903b8c1-bd64-4e7b-a099-5ccf18814b33>

HOBIES

- programming
- sports: football, volleyball, cycling, snowboarding, paragliding
